- **Programming Tools:** Eclipse, NetBeans, Visual Studio 2005, 2008, 2012, 2013, and Microsoft Visio.
- **App server/Middleware:** Tomcat, IIS7.
- **Framework:** Entity Framework.
- **Configuration Management tools:** SVN, CVS, Team Foundation Server 2010, Team Foundation Server 2012. GitHub, GitLab.
- **Browsers:** FireFox, Chrome.
- **OOAD/OOP:** Object Oriented Analysis (OOA), Object Oriented Design (OOD), Object Oriented Programming (OOP), Unified Modelling Language (UML).

## OPERATING SYSTEMS

Windows, Linux, MacOS

## **PROFESSIONAL EXPERIENCE**

**April 2014 – Now**

### **Developer - (RQ1 Maintenance project)**

#### **Project Description:**

This is a project of Ramquest Company (Title Insurance). We fix bugs that occur when customer deploy this application.

#### **Responsibility:**

- Study requirement of bugs.
- Create Unit Test Case.
- Code.
- Test Unit Test.
- Review code and fix bugs.
- Support team members to fix bugs.

#### **Technologies Used:**

- Programming language: .Net.
  - Database: SQL Server 2012.
  - Frameworks: Entity Framework.
- 

**July 2014 – Now**

### **Developer/Team Leader - (Medicine project)**

#### **Project Description:**

This is a project of Medicine Company in USA. The project is about medicine. When the patients have pain or ill, they can use this app to search their symptoms. Then, the system will be automated to chat with patients to get information and after that, the system will be shown the recommendation for the patient. Other side, users can view information of drugs, find the location of pharmacy and check out product... This app has some special features for administrator, example: manage user's information, statistic information....

#### **Responsibility:**

- Study requirement.
- Create Unit Test Case.
- Code.
- Test Unit Test.
- Review code and fix bugs.
- Manage Team.
- Support team members.

#### **Technologies Used:**

- Programming language: JavaScript (Hybrid iOS App)
  - Database: MySQL, CouchDB, PoundDB.
  - Frameworks: Ionic Framework.
- 

**May 2014 – August 2014**

## **Team Leader - (E-portal Communication project)**

### **Project Description:**

There are many troubles with communication system which University in Viet Nam is using to communicate with people concerned. So, we create a new trend of communicating. It brings new way to get more convenient in communication between school, parents and students.

The purpose is done by creating many wonderful features in this system. With apps, students can access to system easier not only on web browser but also on mobile wherever they are. The same to parents, they can get the notifications from school when have new important things, they can also know how their child study in school easier. Moreover, this system helps us to break out of all trouble before when we use CMS and paper letter or phone for communication.

### **Responsibility:**

- Study requirement and review the SRS created by team.
- Support write SRS for team member.
- Support design UI for team member.
- Support code hard module for team member.
- Create the Test Plan.
- Review test case and test evidence of team member.
- Review test result.
- Review User Guideline and create Installation Instructions Guideline.
- Manage team.

### **Technologies Used:**

- Programming language:
    - Web App: .Net, HTML5, CSS3 (JWidget library).
    - Smartphone App: Java (Andriod native)
  - Database: SQL Server 2012.
  - Frameworks: MVC4, Entity Framework.
- 

**November 2013 – April 2014**

## **Developer - (RQ1 Renovation project)**

### **Project Description:**

This is a project about Title Insurance of Ramquest Company in USA. We develop this application to the cloud computing. It use .Net technology (Winform and WCF) and we develop the service.

### **Responsibility:**

- Study requirement.
- Create Detail Design.
- Create Unit Test Case.
- Code.
- Test Unit Test.
- Review code and fix bugs.
- Support team member fix bugs.

### **Technologies Used:**

- Programming language: .Net.
- Database: SQL Server 2012.

- Framework: Entity Framework.
- 

## **May 2013 – September 2013**

### **Team Leader - (ORMS project)**

#### **Project Description:**

Developing an information management program and the order rooms, manage user accounts, the cash price and the automatic reminder debt collection, establish of sales reports.
